Key features

Multi OS

- Web based / OS independent application
- Collaboration through desktop computers, handheld devices, and VR headsets
- OS independent desktop sharing

Enterprise ready

- Easy installation with minimum maintenance requirements
- Integration with user management systems

Secure

- Encrypted collaboration sessions
- On premise/cloud server installation

CAE ready

- Associate BETA applications in collaboration sessions

neere

Key features

- Gain full access to office workstation

Home office

- Communicate via chat, voice & video in all collaboration scenarios

Teamwork

- Run BETA applications on a remote high-performance server
- Work efficiently in low bandwidth networks

Performance

- Allow external partners to work on models while keeping the files in house

Confidentiality
