

ANSA / μETA / CAD Data Translators
Platform Support Letter
June 21, 2011

BETA CAE Systems S.A. announces the platforms
to be supported by the following releases
of its software products

BETA CAE Systems S.A. announces the gradual discontinuation of the support of UNIX platforms by its software products, ANSA, μETA & the CAD Data Translators.

The next point release, ANSA v13.2 and the respective CAD Data Translators to be released with it, will not be available for the following UNIX platforms: HP-UX, IBM-AIX and SUN-Solaris.

The Mac OS **and Linux** will continue to be among the supported platforms.

The support of Windows 2000 SP3 will also be discontinued and Windows XP SP1 will be the earliest MS-Windows version to be supported.

The scheduled second point release ANSA v13.1.4 and the respective CAD Data Translators to be released with it, is planned to be the last ANSA release to be available on HP-UX, IBM-AIX and SUN-Solaris platforms.

The imminent μETA v6.7.0 will be made available on the above UNIX flavors, whose support will be gradually discontinued.

We are at your disposal for any further question or request.
