Supported platforms

µETA v6.8.x is available on MS-Windows, Linux and Mac OS only.
The support of the UNIX platforms: HP-UX, IBM-AIX and SUN-Solaris is discontinued.
The support of Windows 2000 SP3 is also discontinued and Windows XP SP1 is the earliest MS-Windows supported version.

For details, please review the latest document on the supported platforms and minimum system requirements

New features introduced

- The Modal Response and FRF Assembly tools can now calculate the pressure on fluid grids from the complex eigenvalues (Nastran SOL107) of a coupled acoustic model.
- META now supports reading, in the 2D Plot tool, modal contribution fractions from Nastran *.pch files.
- It is now possible to draw the interior surfaces of Fluent models.

Known issues resolved

- The result option "Max of In Out/All Layers" would not calculate correct results from Abaqus *.odb files.
- The 32-bit MS-Windows version of META would crash when reading FEMZIP-L files compressed with the 64-bit executable.
- The graphics performance of META would deteriorate when working with multiple Pamcrash *.DSY files and numerous plotted curves.
- Pamcrash TETRA10 elements would not be read.
- META would not read certain Permas *.uci files.
- META would not read certain Ensight files.

Compatibility

µETA v6.8.3 can only run with beta_lm_tools v6.0 or later. The latest beta_lm_tools version is v6.3.
The .metadb files saved by the later versions of µETA are compatible and can be opened by earlier versions of µETA.

Documentation

Documentation is packed into the "common" file. While the "common" file is unpacked, you will find an html file that will guide you through the available PDF documents, including the Release Notes and the Users Guides.

Release Notes

Please refer to the Release Notes document for more details about the software corrections and the new features.
A detailed Release Notes document is available in PDF in the download directory and also in the /docs sub-directory within the installation directory.

Users Guide

An Users Guide, updated for version 6.8.3, is also available in PDF.

Tutorial files' availability

The demofiles necessary to cover the tutorials' documentation are available as separate downloads within the META_POST_TUTORIALS folder of the [Public] area. Some tutorial files have been updated for µETA v6.8.2.

Where to download from

Customers who are served directly by BETA CAE Systems S.A. may download the new software, examples and documentation from their

account in our server. They can access their account through the user login link at our web site http://www.beta-cae.gr
Contact us if you miss your account details. The [Public] link will give you access to the public downloads area.
Customers who are served by a local business agent should contact the local support channel for software distribution details.

What to download

For the installation of the software on each platform type, the following are needed:

the tar file with the respective platform name (e.g. Linux etc.), or the respective zip file for Windows and
the "common" .tar or .zip file

Previous software releases can be found in the sub-directory called "old".

Particularly for the support of Abaqus .odb files

- Only for the support of Abaqus .odb files and depending on the Abaqus version you use, you will need to download the corresponding file(s), containing Abaqus libraries, from the META_POST_EXT_LIBS directory within the [Public] link.
  If the support of Abaqus .odb files is not an issue then there is no need to download these files.
  To support, at the same time, Abaqus 6.3-4 (or earlier), Abaqus 6.4-x, Abaqus 6.5-x, Abaqus 6.6-x, Abaqus 6.7-x, Abaqus 6.8-x, Abaqus 6.9-x, Abaqus 6.10-x, Abaqus 6.11-x and Abaqus 6.12-x .odb files, it is recommended to download all respective Abaqus files.
  Note that for the support of .odb files of Abaqus version 6.8-x or later on Windows platforms, extra actions may be required.
- The Abaqus libraries have to be downloaded once. If these files are downloaded now (or have been already downloaded with a previous μETA version), there is no need to download them again with a future version of μETA.
- It is also possible to use the Abaqus libraries directly from the installation directory of the Abaqus software, if this directory is accessible. In this case you can avoid downloading the respective Abaqus libraries from the [Public] link.

For more details, please, refer to the SetUp Guide.

Sample files for tutorials & examples on automation

Sample files that can be used with the tutorials as well as examples on automation can be downloaded from the META_POST_TUTORIALS directory within the [Public] link.
