Empower your experience

Biomedical and Automotive Optimization with Optimus, ANSA, and µETA

Multidisciplinary optimization is vital for a great variety of applications covering many industries.

This webinar demonstrates how Optimus manages a biomedical optimization case using the efficiency of the ANSA and µETA suite.

In addition, an automotive optimization case will be demonstrated incorporating both a crash and a static analysis, exploiting the multidisciplinary capabilities of Optimus and BETA CAE Systems products coupling. Join this webinar to discover how easily Optimus integrates ANSA and µETA into a design optimization process, and how Optimus allows you to get the best value from your simulations.
