BETA CAE Systems announces the release of the new version of the license management software BETA LM Tools v6.4

[Read the online version](#)

Announcement

BETA CAE Systems S.A. announces the release of the new version of the license management tool BETA LM Tools v6.4. This release focuses on the improvement of the performance and effectiveness of the tool.

Known Issues Resolved

The communication between the License Manager and the Client could be unexpectedly lost, forcing to (save and) exit. This issue has been noticed in certain cases due to full credit usage and high amount of license requests.

Several performance fixes and upgrades have been made to ensure uninterrupted communication between the License Server and clients.

Supported Platforms

BETA LM Tools v6.4 is available for Windows (32bit, 64bit), Linux (32bit, 64bit) and MacOS (32bit, 64bit). The support of Unix systems (SGI Irix, Sun Solaris, HP-UX, IBM AIX) was discontinued.

Compatibility

BETA LM Tools 6.4 does not require a new host key. Existing license files are compatible with the new license manager.

The new version is compatible with all the previously released BETA CAE Systems software.

Future versions of BETA CAE Systems software will continue to be compatible with the previous version of BETA LM Tools.

Improvements apply to all versions of BETA CAE Systems Software with performance being further increased for software released after the 14th of September 2015.

Download

Customers who are served directly by BETA CAE Systems, or its subsidiaries, may download the new software, examples and documentation from their account on our server. They can access their account through the "user login" link at our web site www.beta-cae.com. Contact us if you miss your account details.

The [PublicDir] link will give you access to the public downloads area.

Customers who are served by a local business agent should contact the [local support channel](#) for software distribution details.
