7 BEFORE REALITY Conference Retrospective

From May 30th to June 1st 2017, the CAE community experienced another successful conference by BETA CAE Systems.

During the 7 Before Reality Conference, New inspiring innovative ideas and success stories have been shared through the event's presentations and through the interaction between the industry, our support engineers, and the software developers.

CAE experts from a number of industries showcased their success stories using the software products of BETA CAE Systems. The event offered the opportunity to presenters and guests to explore a widely differentiated portfolio of applications of our software products and demonstrated how state of-the-art engineering progress, with vision and determination, and with effective product development tools and methodologies can contribute to the success.

More than 190 guests from more than 90 companies, coming from 20 different countries, joined the engineering personnel of BETA CAE Systems to share their work, pass their experience, exchange their thoughts, and promote their requirements.

Focused on numerous disciplines and industries, around 85 contributed presentations and 25 demos, kept the attention of the audience unabated, composing the main body of the event. The arrangement of the presentations according to subject relevance, allowed the attendees with similar interest to get to know each other and discuss different approaches and applications of our software in their field of interest.

The presentations of the key note speaker Yair Soffair (Mechanical Analysis Manager of Elbit Systems Electro-Optics Elop., Israel), guided us through his journey full of challenges and solutions in the simulation process for the most advanced electro-optics technology. Mr. Soffair will also emphasized the benefits from deploying our software in his organization.

The programme also included additional presentations, highlights of the latest and future developments, and demonstrations on the ANSA / EPILYSIS / META suite, SPDRM (Simulation, Process, Data & Resources Management) and the newer
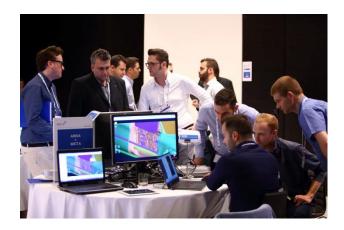

physics on screen

additions to our solutions portfolio KOMVOS (the SDM console), and RETOMO.

The technical gallery (showroom), organized in different application areas and disciplines offered the unique opportunity to the participants to interact with both our support and development engineers and discuss on current practices and also on requests for future developments.

As in our previous conferences, the interaction among the participants remained intense during the offered meals and especially during the social event themed as "Greek night.

We at BETA CAE Systems thank and congratulate the participants for their contribution to the success of the event. We are looking forward to hosting you again during one of our following events.
