Release announcement for upgraded CATIA V5 to ANSA translator libraries

February 12, 2009

BETA CAE Systems S.A. announces the release of libTfFundations libraries for the support of CATIA V5 R19 files

A folder named "libTfFundations_for_R19" can be found at the [Public] downloads area at your account in our server.
This folder contains the libTfFundations libraries for the respective supported platforms which enable the CATIA V5 to ANSA translator to process CATIA V5 R19 (or previous releases) files.

The files that are contained in these packages should be placed into the respective sub-folders of the lib folder of the ANSA installation at your systems.
The newly distributed libTfFundations library files should replace the existent files with the same name.

The function of this library distribution is verified for ANSA v12.1.4 and later, including ANSA v13.0.

About the supported platforms: please, read the CAD data translators documentation for details.
