CAE Technology Symposium - Advanced CAE Technologies for Automotive Engineering June 9, 2009, Pune, India

EASi has partnered with **ARAI** to host this highly technical and educational event for the Indian Automotive industry. The **CAE Technology Symposium - Advanced CAE Technologies for Automotive Engineering** will take place on June 9, 2009, at ARAI, Pune, India.

This symposium covered the engineering challenges associated with meeting the increasingly demanding performance expectations from OEMs and progressively stringent safety regulations. Leading industry experts from India and abroad covered advances in Safety regulations, Testing and Certification, and Simulation technology.

Among the speakers were Mr. Konstantinos Kiouptsidis and Mr. Stefanos Chatziangelidis of BETA CAE Systems S.A. and gave respectively the following presentations:

Multi-Disciplinary Design Optimization

Mr. Kouptsidis, discussed the new developments in CAE process automation and demonstrate multi-disciplinary design optimization technologies using ANSA, LS-OPT and μ ETA interfacing within optimization cycles.

Bridging physical test and simulation methods

Mr. Chatziangelidis presented new modeling technologies that enable better correlation between physical tests and CAE simulation methods.
