Release highlights

The collaboration scenarios are further extended to include KOMVOS as a remote application.

File sharing within NEERE rooms is now possible minimizing the need for external tools and boosting the efficiency of collaboration sessions. Users are able to share presentations, images, notes and models up to a specific file size configurable during NEERE installation.

Performance improvements reduce the initialization time of applications and increase the stability of rooms under heavy load. Same time, search performance and avatar handling have also been improved.

Further improvements to avoid performance drop include the pause of the camera feed of users when switching to other tabs in web browser.

Finally, as an additional feature of enhanced privacy, the virtual background can be activated in the video tab.

For more details about the new software features, enhancements and corrections please, refer to the Release Notes document.

Supported Web browsers

Mozilla Firefox, version 68 or higher
Google Chrome/Chromium, version 72 or higher
Microsoft Edge, version 80 or higher

For details, refer to the "NEERE technical requirements and installation guide" document which resides within the NEERE download folder on our server.

Download

Where to download from

Customers who are served directly by BETA CAE Systems, or its subsidiaries, may download the new software and documentation from their account on our server. They can access their account through the "sign in" link at our [web site](#).

Contact us if you miss your account details. The Downloads menu items give you access to the public downloads.

Customers who are served by a local business agent should contact the [local support channel](#) for software distribution details.

What to download

All files required for the installation of this version reside in the folder named: "**NEERE_v1.4.0**" and are dated as of **May 19, 2022**.
