

Beijing February 14, 2023

BETA CAE Systems China, Delft Software Technology, and Changshu Institute of Technology (CIT) jointly establish a Simulation Analysis Center

BETA CAE Systems, Delft Software Technology, and the School of Automotive Engineering of the Changshu Institute of Technology (CIT), sharing a passion for CAE and a commitment to the education of young engineers, joined their forces and established the “CIT Simulation Analysis Center of the School of Automotive Engineering”, which was formally inaugurated on February 13, 2023.

The Center, hosted in the premises of CIT, was funded, and supported by Delft Software Technology (Suzhou) Co., Ltd., while BETA CAE Systems China Ltd. had the privilege to contribute to the Center its software portfolio and technical support. The premises of the Center can accommodate 30 students in fully equipped workstations and give to the students to expand their knowledge in Engineering Simulation and have a hands-on experience in the most advanced software in the field.

For this purpose, BETA and the School jointly established in the Center the “ANSA Practice Research Center of Changshu Institute of Technology”, for the proliferation of the knowledge in Engineering Simulation and the expertise in the use of the software suite of BETA CAE Systems.

About BETA

BETA CAE Systems China Ltd. is a wholly owned subsidiary of BETA CAE Systems International AG in China. BETA CAE Systems International AG is a leading contemporary industry supplier of simulation solutions, with global presence in numerous sectors. BETA CAE Systems China is in charge for the business of BETA in China by providing software sales, technical support, and engineering services.
