

BETA China and LCFC Forge Strategic Partnership to Drive Innovation

Beijing, May 8, 2024

With great enthusiasm, the technical and marketing teams of BETA CAE Systems China visited Hefei Lenovo Technology Port to deliver the 2024 BETA Workshop.

The teams of both elaborated on the latest features of ANSA and META pre- and post-processors of BETA, and their implementation, covering a broad range of topics such as Machine Learning, AI, and simulation process management. LCFC's engineers discovered new software tools and shared their daily challenges, to which BETA engineers offered tailored solutions, which spread confidence that BETA CAE Systems software will continue playing an important role in driving LCFC advancements.

LCFC, Lenovo's largest global R&D and manufacturing base for intelligent computing equipment, and BETA work closely on notebook computer R&D simulations. Our joint efforts led to the successful development of a fully automated modeling process in 2023, with a remarkable 200% simulation process efficiency increase. This success has paved the way for further collaboration opportunities, with BETA being committed to providing advanced simulation technology and support to help LCFC drive continuous innovation.

We at BETA CAE Systems extend our appreciation to LCFC for their trust and confidence in our products and services, and for hosting the 2024 BETA Workshop.

About BETA CAE Systems

BETA CAE Systems transformed engineering simulation by introducing revolutionary process automation software tools and practices into Simulation and Analysis, more than 30 years ago. Committed to our mission to enable engineers to deliver results of high value, we continue to offer state-of-the-art, high-performance software and best-in-class services to the industry, around the world.
