# Q&A on NEERE

## 1. What is NEERE?

NEERE is a web browser based collaboration platform for CAD/CAE engineers developed to organize teamwork and boost productivity. It offers a complete communication hub and is integrated with BETA CAE Applications (ANSA and META).

## 2. Why was NEERE developed?

NEERE is the answer to our clients' need for a straightforward and easy to use solution to collaborate with their peers around the world. It organizes teamwork in virtual rooms and enables communication via speech, text and video. Collaborators can work with BETA CAE Applications even if they do not have access to the specific software by launching them on servers.

## 3. Who should use NEERE?

NEERE is mainly developed to facilitate collaboration between CAD/CAE engineers by giving access to BETA CAE Applications. However, the additional screen sharing functionality extends its use to any professional that wants to securely collaborate with peers in different locations around the world in fully encrypted sessions.

## 4. Do I need a specific background in order to work with NEERE?

Its user-friendly interface makes NEERE easy to use without any previous knowledge of other software required.

## 5. Can I install NEERE by myself?

Although NEERE installation is straightforward it is highly recommended that it is done either in the presence of or by an IT specialist.

## **6. Which are the hardware and software requirements for NEERE?**

The software and hardware requirements for NEERE are documented in detail in the technical requirements document.

## **7. Which software is a prerequisite for NEERE?**

BETA License Manager (BETA\_LM version 6.6 and above) should be up and running.

## **8. Do I need a special feature in the license file?**

The required features are:

NEERE\_SERVER

NEERE\_ROOM

NEERE\_USER

## **9. How many credits does NEERE require?**

The server requires 100 credits.

For every active room (i.e. at least one user is in the room) 10 credits are required.

For every user that is active in a room 1 credit is required.

## **10. What do I need to download?**

Only the NEERE server installer is required for the server. At every client the NEERE client software needs to be installed (no admin privileges are required).

## **11. What does the installation package contain?**

In order to make the NEERE server installation quick and easy we have included everything that NEERE requires in the installation package. For more details please check the installation guide.

## 12. May I have an evaluation installation of NEERE?

An evaluation installation is available for limited duration. During the evaluation period full support is provided by BETA CAE Systems.
